

Palgrave Studies in Logistics and Supply Chain Management

Series Editors

Martin Christopher, School of Management, Cranfield University,
Cranfield, Beds., UK

Emel Aktas , School of Management, Building 32, Cranfield
University, Cranfield, UK

Logistics and supply chain management has always been critical to business success and to the efficient running of economies and the well-being of the societies they serve. In recent years, however, the importance of these activities has been highlighted by geopolitical challenges and uncertainty that have threatened global supply chains.

The series provides an opportunity to explore in-depth and with rigour topics such as digital transformation, supply chain risk and resilience, sustainability and the circular economy, and the future of global supply chain design and management. Entries in the series are international in outlook, providing fresh and innovative approaches to pressing issues in logistics and supply chain management.

ACKNOWLEDGEMENTS

Special thanks to my husband and my children for their patience and understanding during the long days spent immersed in this writing journey. To my research collaborators, Chiara and Sara, for their insightful feedback.

I extend my gratitude to all the interviewees for their availability, without which this research would not have been possible.

ABOUT THE AUTHOR

Federica Pascucci is currently an Associate Professor at the Department of Management of Università Politecnica delle Marche, where she teaches Marketing and Digital Marketing. She holds her PhD in Management in 2002. From 2003 to 2006, she was research fellow at Università Politecnica delle Marche and from 2006 to 2018 she was researcher at the same university. She earned the Italian National qualification as a Full Professor in 2022.

Her main research interests focus on digital transformation, innovation ecosystems, business model innovation, and, more recently, sustainability from a strategic and managerial perspective. Over the past 15 years, she has conducted empirical studies, collaborating with firms and experts in the coffee sector. She has authored numerous national and international publications on these subjects.
